## OUTLOOK AND STRATEGY

**Market Review.** The BPI Money Market Index returned 0.30% in November, while benchmark short-term government yields rose 46 basis points (bps) on average. Average daily trading volume rose to PHP11.35 billion from October's PHP7.04 billion with trades mostly seen on the short end (3- to 6-month papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in November. The yields across the three tenors (91-, 182-, and 364-day) rose following the 75-basis point hike by the Bangko Sentral ng Pilipinas (BSP) this month. The last auction for the month saw the 91-day fully awarded at an average rate of 4.205%, while the 182-, and 364-day papers partially awarded at average rates of 4.920%, and 5.150%, respectively. Towards the end of the month, the BTr released the December auction schedule with two Treasury Bill auctions and three FXTN issuances (5-, 12-, and 20-year tenors).

In the local economic space, the 3Q GDP expanded faster than expected at 7.6% YoY, mainly driven by strong consumption growth as overall mobility increased and revenge travel spending soared despite the higher cost of living. The local inflation for the month of October rose by 7.7% year-on-year, its highest level in 14 years. Prices for food and fuel remained elevated amid weather disturbances and supply side pressures. Consequently, the BSP hiked rates by another 75 basis points during their policy meeting held mid-month. Central bank officials continued to reiterate that they remained prepared to raise rates as needed, given persistently high CPI levels, as well as central bank policy tightening measures globally.

**Fund Performance.** The Fund returned 0.85% during the month, above its benchmark by 58 basis points.

**Fund Strategy.** The Fund continues to maintain its holdings in short duration government securities. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
