Liquidity Risk:	Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Credit/Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.42% in December, while benchmark short-term government yields rose 1 basis point (bps) on average. Average daily trading volume fell to PHP9.65 billion from November's PHP11.35 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) only held one Treasury Bill auction in December. The 91-day paper was fully awarded at an average rate of 4.089%, while the 182-day paper was partially awarded at an average rate of 4.920%. Meanwhile, the BTr fully rejected the bids on the 364-day paper. The last T-Bill auction for the month was cancelled. On the other hand, BSP's 28-day paper was last awarded at an average yield of 6.4426%, 44 basis points higher than last month's. Towards the end of the month, the BTr released the January auction schedule with four Treasury Bill auctions and four FXTN issuances (7-, 13-, 20- and 10-year tenors).

The local inflation for the month of November rose by 8.0% year-on-year, its highest level in 14 years. The spike is mainly attributed to elevated food and fuel prices amid weather disturbances and supply side pressures. Consequently, the BSP hiked rates by another 50 basis points during their last policy meeting for 2022 held mid-month. In addition, the BSP inflation forecast was adjusted to 4.5% from 4.3% for 2023. BSP officials continued to reiterate that they remained prepared to raise rates as needed, given persistently high CPI levels, as well as central bank policy tightening measures globally.

Fund Performance. The Fund returned 0.36% during the month, outperforming the benchmark by 9 bps. Meanwhile, the Fund returned 1.57% YTD, below the benchmark by 11 bps.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
