Credit/Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.15% in August, while benchmark short-term government yields rose 23 basis points (bps) on average. Average daily trading volume fell to PHP14.46 billion from July's PHP14.95 billion with trades mostly seen on the belly (5- to 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held five Treasury Bill auctions in August. The last auction for the month was rejected as yields for Treasury Bills remain elevated given rate hike expectations. Average rates for the last awarded auction of the 91-day paper, 182-day paper and 364-day paper were at 2.070%, 3.336% and 3.782%. Towards month-end, the BTr released its September auction schedule, announcing four FXTN issuances (3.5-, 10-, 7-, and 16-year tenors) and four Treasury Bill auctions.

In the local economic space, July inflation rose by 6.4% year-on-year, the fastest pace since November 2018. Price pressures remain elevated for the month driven mostly by expensive food, transport, and utility costs. Consequently, the Bangko Sentral ng Pilipinas (BSP) raised their policy rates by 50bps during their Monetary Board meeting on August 18. Moreover, the central bank revised their inflation forecast upward to 5.4% for 2022. BSP Governor Felipe Medalla kept a hawkish stance remarking further interest rate hikes not to be ruled out for the rest of the year.

Fund Performance. The Fund returned 0.20% during the month, above the benchmark by 5 bps. Meanwhile, the Fund returned 0.63% YTD, below the benchmark by 12 bps.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
