Liquidity Risk:	Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/factors.
Credit/Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.24% in January, as benchmark short-term government yields fell 28.13 basis points (bps) on average. Average daily trading volume rose to PHP17.168bn from December's PHP14.880bn with trades mostly seen on the short-end (3 months to 3-year papers) and belly (7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in January. Treasury Bills saw yields inch lower throughout the month, as the market became flushed with liquidity following large FXTN maturities in January. Preference for the shorter end of the curve prevailed as all the auctions continued to be oversubscribed. Average rates for the last auction of the 91-, 182- and 364-day papers were awarded at 0.693%, 1.07% and 1.410%, respectively. Towards month-end, the BTr released its February auction schedule, announcing four FXTN issuances (4-, 7- and two 10-year tenors) and four Treasury Bill auctions.

In the local economic space, December inflation further eased to 3.6% year-on-year, primarily driven by slower food inflation and transport inflation. Full-year inflation averaged to 4.5% breaching the Bangko Sentral ng Pilipinas (BSP)'s 4.4% target for 2021. 4Q GDP data came out at 7.7%, well-above the expected 6.3%, lifting the full-year 2021 growth to 5.6%. The 4Q GDP growth figure was driven by household consumption as falling Covid-19 daily infection rates in December helped spur spending during the holiday season. Post-holiday celebrations however, daily cases rose and positivity rate reached its peak resulting in Metro Manila and other cities raising to Alert Level 3 lockdown for January.

Fund Performance. The Fund returned 0.15% during the month, outperforming the benchmark by 9 bps.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
