## OUTLOOK AND STRATEGY

**Market Review.** The BPI Money Market Index returned -0.04% in July, while benchmark short-term government yields rose 61 basis points (bps) on average. Average daily trading volume rose to PHP14.95bn from June's PHP8.35bn with trades mostly seen on the belly (5-year and 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in July. Average rates for the last awarded auction of the 91-day paper, 182-day paper and 364-day paper were at 2.273%, 3.143% and 3.356%. Awarded yields for Treasury Bills have been elevated given rate hike expectations as inflation continues to trend higher. Towards month-end, the BTr released its August auction schedule, announcing four FXTN issuances (3.5-, 7-, 10-, and 5.5-year tenors) and five Treasury Bill auctions.

In the local economic space, June inflation rose by 6.1% year-on-year, the fastest pace since November 2018. This was on the back of rising food and fuel costs, as geopolitical tensions continue to keep oil prices elevated. Consequently, the BSP surprised markets, raising policy rates mid-month by 75 basis points to 3.25%. This was the largest single rate hike in history and was also the first off-cycle move since the pandemic began in 2020. The central bank will continue to monitor economic data and adjust policy settings as needed.

**Fund Performance.** The Fund returned 0.01% during the month, below the benchmark by 11 bps. Meanwhile, the Fund returned 0.44% YTD, underperforming the benchmark by 16 bps.

**Fund Strategy.** The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
