KEY RISKS AND RISK MANAGEMENT

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.03% in June, while benchmark short-term government yields rose 34 basis points (bps) on average. Average daily trading volume fell to PHP8.35bn from May's PHP10.89bn with trades mostly seen on the short-end (3-month to 3-year papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in June. Average rates for the last awarded auction of the 91-day paper, 182-day paper and 364-day paper were at 1.855%, 2.400% and 2.630%. Towards month-end, the BTr released its July auction schedule, announcing four FXTN issuances (4-, 7-, 10-, and 14-year tenors) and four Treasury Bill auctions.

In the local economic space, May inflation rose to 5.4% year-on-year from 4.9% in April, well-above central bank's 2-4% inflation target. Higher prices were primarily driven by steep global oil and food prices. The Bangko Sentral ng Pilipinas (BSP) raised its policy rates to 2.5% from 2.25% to rein in continued price pressures driven by war in Europe and supply chain disruptions. Moreover, the BSP revised its inflation forecast upward for 2022 and 2023 to 5% and 4.2%, respectively.

Fund Performance. The Fund returned 0.07% during the month, below the benchmark by 3 bps. Meanwhile, the Fund returned 0.43% YTD, underperforming the benchmark by 4 bps.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets
