OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.16% in September, even as benchmark short-term government yields rose 75 basis points (bps) on average. Average daily trading volume fell to PHP10.62 billion from August's PHP14.46 billion with trades mostly seen on the belly (5- to 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in September. Most of the 91- and 364-day papers were rejected, while two of the found 182-day auctions were only partially awarded. The BTr appeared unwilling to award as investors demanded higher yields for their short-term papers. The last auction for the month saw only the 182-day paper partially awarded at an average yield of 3.958%. Towards month-end, the BTr released its October auction schedule, announcing four FXTN issuances (3-, 6-, 10-, and 13-year tenors) and four Treasury Bill auctions.

In the local economic space, inflation for the month of August rose by 6.3% year-on-year, slightly lower than the 6.4% in July. Prices for food and fuel remained elevated as supply side pressures persisted. Consequently, the Bangko Sentral ng Pilipinas hiked rates by another 50 basis points to 4.25%. It likewise revised upward its local inflation forecasts for 2022 to 2024. The central bank will continue to monitor economic data and adjust policy settings as needed.

Fund Performance. The Fund returned 0.16% during the month, below the benchmark by 1 bp. Meanwhile, the Fund returned 0.79% YTD, below the benchmark by 13 bps.

Fund Strategy. The Fund favors the safety of shorter dated securities and Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:
