KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

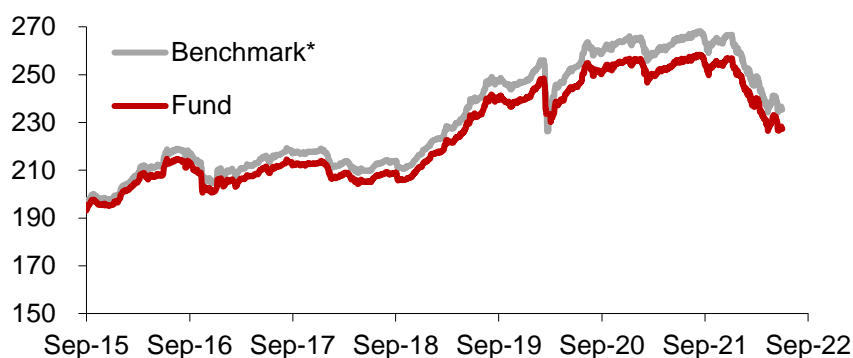

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines declined by 5.36% in September as Philippine dollar-denominated bonds tracked movements in US Treasuries. ROP yields rose by an average of 110 basis points month-on-month.

Global bond markets had another volatile month following hawkish rhetoric from the US Federal Reserve (the Fed). During the September Federal Open Market Committee (FOMC) meeting, policy makers hiked rates by another 75 basis points, and reiterated its commitment to fight inflation. The Committee cited modest gains in US spending and production as well as robust jobs figures in recent months, but stated that it remained “highly attentive” to inflationary risks. These statements sparked a sell-off in US Treasuries, driving the US 10-year benchmark Treasury yield to the unprecedented 4% level in secondary market trading. Elsewhere around the world, the Bank of England took a more dovish tone as it announced that it would begin temporarily buying back long-dated bonds to calm the market. Investors had reacted negatively to the British government’s latest fiscal policy announcements. On a monthly basis, the 10-year US Treasury yield rose 48 basis points to close at the 3.83% level.

In the local economic space, inflation for the month of August rose by 6.3% year-on-year, slightly lower than the 6.4% in July. Prices for food and fuel remained elevated as supply side pressures persisted. Consequently, the Bangko Sentral ng Pilipinas hiked rates by another 50 basis points to 4.25%. It likewise revised upward its local inflation forecasts for 2022 to 2024. The central bank will continue to monitor economic data and adjust policy settings as needed.

Fund Performance. The fund returned -5.58% in September, underperforming its benchmark by 22 bps. Year-to-date, it outperformed the benchmark by 17 basis points with a return of -14.97%.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
