KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a portfolio of Philippine Sovereign and corporate securities comprising the JP Morgan Asia Credit Philippines Total Return Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

Index Tracking Risk: Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines gained 1.16% in December as Philippine dollar-denominated bonds recovered earlier months' losses. However, 2022 was a tough year for global bonds amid the Russia-Ukraine war and the ongoing fight against rising inflation. Over the past year, the JACI Philippines declined by 13.48%.

Global bonds experienced yet another volatile month as improving US inflation was countered by the US Federal Reserve's (the Fed) determination to maintain its aggressive hike path. Earlier in December, the November US CPI was released at 7.1%, lower than consensus estimates and the prior month's 7.7%. This sparked a rally in US Treasuries as investors speculated that the Fed may begin to slow down the pace of its rate hikes. However, gains were reversed after the Fed reiterated that it would remain committed to its fight against inflation, citing a higher terminal rate for the Fed Funds rate. The Bank of Japan's decision to widen its target band for 10-year JGBs from 25 basis points to 50 basis points likewise weighed heavily on bond market sentiment. The 10-year US Treasury yield fell to as low as 3.54% before closing the month at the 3.87% level.

In the local economic space, inflation for the month of November rose by 8.0% year-on-year, higher than the 7.7% in October. This marked the highest year-on-year change since 2008, as food and fuel prices were affected by supply-side pressures and weather disturbances. Consequently, the Bangko Sentral ng Pilipinas hiked rates by another 50 basis points during their final policy meeting for 2022 held mid-month. Central bank officials continued to reiterate that they remained prepared to raise rates as needed, given persistently high CPI levels, as well as central bank policy tightening measures globally.

Fund Performance. The fund returned 0.78% in December, underperforming its benchmark by 38 bps. Year-to-date, it underperformed the benchmark by 52 basis points with a return of -13.98%.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
