OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) had quite a swing in the 2nd month of 2022. The local bell-weather index managed to reach the 7,500 level earlier in February as the country saw a recovery from the OMICRON variant surge in January. The government eased restrictions and shifted to the lowest classification or Alert level 1 effective March first. Geopolitical tensions took the spotlight as Russia shocked the world following its “special military operation” or invasion of its neighbor country – Ukraine. The earlier gains of the index were pared and it ended 0.7% lower on a month-on-month basis to 7,311.01.

The local equities market saw more activity, with average daily turnover registering at US\$188 million in February or 58.6% higher compared to January. Meanwhile, Foreigners were net buyers after recording a Net Inflow worth US\$141 million on re-opening optimism of the country amidst the improving COVID-19 cases. They were seen buying cyclical particularly SMPH and ALI as these stocks yielded inflows of US\$55.4 million and US\$38.9 million, respectively.

In terms of performance, telecommunications sector was the biggest underperformer for the month. GLO (-17.43%) and CNVRG (-15.17%) were 2 of the 3 biggest laggards in the PSEi along with consumer stock, EMP (-18.65%). Meanwhile, the main advancers include: SMPH (+13.39%), MER (+9.85%) and SECB (+8.86%).

Fund Performance. The Fund registered a loss of 0.32% in February, outperforming its benchmark by 37 bps. Meanwhile, the YTD performance of the Fund reported a gain of 3.59%, outperforming its benchmark by 95 bps.

Fund Strategy. We look to stay on the sidelines as high volatility from geopolitical tensions intensifies. We will adopt a defensive stance and take advantage of names primed to benefit during the dividend season (between Feb to April). However, we will remain nimble and be ready for any potential tactical opportunities that may come.
