OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) bounced back in July following a steep decline in June. Both local and global economic developments rattled investors at the early part of the month on persisting concerns of inflation (came in at 6.1% in June) and peso depreciation (rising above the Php56 level). Then, the Bangko Sentral ng Pilipinas (BSP) announced an off-cycle interest rate hike, increasing key policy rates by 75 basis points. Similarly, U.S inflation continued to rise (at 9.1% in June) and the US Federal Reserve subsequently raised its target Fed Fund Rates by another 75 basis points. However, bargain-hunting ensued towards the latter part of the month on renewed optimism following lower commodity prices and a slowdown US consumer spending and production data which suggest that inflation may have already peaked. The latter could lead to a less aggressive rate hikes by the US Federal Reserve. The Philippine Stock Exchange Index closed at 6,315.93 or 2.61% higher month-on-month

In terms of market activity, lack-luster trading continued with the average daily turn-over at US\$90 million or 16.7% lower month-on-month. Meanwhile, net foreign selling persisted for the 5th straight month at US\$ 80 million. Foreign participation came in at 41%, lower than 44% in June.

In terms of individual stock performances, top contributors for the month include: AEV (+19.98%), WLCON (+16.18%) and AGI (+12.39%) while the laggards were CNVRG (-10.17%), GLO (-9.08%) and GTCAP (-7.28%).

Fund Performance. The Fund registered a gain of 2.02% in July, underperforming its benchmark by 59 bps. Meanwhile, the YTD performance of the Fund reported a loss of 8.98%, outperforming its benchmark by 235 bps.

Fund Strategy. The Fund will remain defensive given the elevated volatility from higher inflation print, weak peso and accelerated global tightening. The fund will look to trim on names that have already priced-in the recovery story and accumulate on emerging value in select sectors.
