OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.25% in January, with benchmark government yields falling 3.13 basis points (bps) on average. Average daily trading volume rose to PHP17.168bn from December's PHP14.880bn with trades mostly seen on the short-end (3 months to 3-year papers) and belly (7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (4-, 10- and two 7-year tenors) and four Treasury Bill auctions in January. The first FXTN auction of the year, a 7-year reissuance, was rejected by BTr. However, demand on FXTN auctions picked up through the month as market became flushed with liquidity following large FXTN maturities in January. Average rates of the 4-year and second 7-year auctions were 4.012% and 4.689%, while the 10-year new issuance was awarded at coupon of 4.875%. The BTr also released its February auction schedule, announcing four FXTN issuances (4-, 7- and two 10-year tenors) and four Treasury Bill auctions.

In the local economic space, December inflation further eased to 3.6% year-on-year, primarily driven by slower food inflation and transport inflation. Full-year inflation averaged to 4.5% breaching the Bangko Sentral ng Pilipinas (BSP)'s 4.4% target for 2021. 4Q GDP data came out at 7.7%, well-above the expected 6.3%, lifting the full-year 2021 growth to 5.6%. The 4Q GDP growth figure was driven by household consumption as falling Covid-19 daily infection rates in December helped spur spending during the holiday season. Post-holiday celebrations however, daily cases rose and positivity rate reached its peak resulting in Metro Manila and other cities raising to Alert Level 3 lockdown for January.

Fund Performance. The Fund returned 0.22% for the month, underperforming its benchmark by 28 basis points.

Fund Strategy. The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
