OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.87% in November, with benchmark government yields falling 5 basis points (bps) on average. Average daily trading volume rose to PHP11.35 billion from October's PHP7.04 billion with trades mostly seen on the short end (3- to 6-month papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in November. The new issuance of the 3-year FXTN 3-28 was rejected, while the reissuance of the 5-year FXTN 20-14 and the 12-year FXTN 25-6 were partially awarded at average yields of 7.131% and 8.168%, respectively. The first 20-year paper (FXTN 20-25) issued this year was priced at 8.125% coupon, and was met with strong demand, spurred by market appetite for duration. Towards the end of the month, the BTr released the December auction schedule with two Treasury Bill auctions and three FXTN issuances (5-, 12-, and 20-year tenors).

In the local economic space, the 3Q GDP expanded faster than expected at 7.6% YoY, mainly driven by strong consumption growth as overall mobility increased and revenge travel spending soared despite the higher cost of living. The local inflation for the month of October rose by 7.7% year-on-year, its highest level in 14 years. Prices for food and fuel remained elevated amid weather disturbances and supply side pressures. Consequently, the BSP hiked rates by another 75 basis points during their policy meeting held mid-month. Central bank officials continued to reiterate that they remained prepared to raise rates as needed, given persistently high CPI levels, as well as central bank policy tightening measures globally.

Fund Performance. The Fund returned -0.23% for the month, below its benchmark by 9 basis points.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
