OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines lost 3.47% in February as Philippine dollar-denominated bonds tracked the sell-off in US Treasuries.

It was a volatile month for global bond markets as the Russia-Ukraine tensions took center stage. Earlier in February speculations for hawkish global central bank actions (including the US Federal Reserve, the Bank of England, and the European Central Bank) caused most investors to sell off their bond holdings. Policymakers had shifted their dovish tone from last year, citing the need to manage elevated inflation that was no longer transitory. In the latter part of the month however, news broke out that Russian's invasion of Ukraine had begun, sparking renewed doubts on a smooth global economic recovery. The geopolitical tensions likewise drove commodities prices higher, particularly oil, further adding fuel to inflationary concerns. Over the month, the benchmark 10-year US Treasury yield rose to as high as 2.04%, before closing the month at the 1.83% level.

In the local economic space, January inflation fell to 3.0% year-on-year, with slower food inflation as well as a more muted rise in utility costs. The figure was slightly lower than consensus estimate of 3.1% and used 2018 as the base year. Food inflation slowed down due to improved harvest and favorable weather conditions. During their policy meeting mid-month, the Bangko Sentral ng Pilipinas (BSP) held its policy rates steady given its current stable outlook on inflation and its priority to support the economy.

Fund Performance. The Fund declined by 0.19% in February, below its benchmark by 21 basis points.

Fund Strategy. The Fund will maintain its duration of less than 1. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
