OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines declined by 5.36% in September as Philippine dollar-denominated bonds tracked movements in US Treasuries. ROP yields rose by an average of 110 basis points month-on-month.

Global bond markets had another volatile month following hawkish rhetoric from the US Federal Reserve (the Fed). During the September Federal Open Market Committee (FOMC) meeting, policy makers hiked rates by another 75 basis points, and reiterated its commitment to fight inflation. The Committee cited modest gains in US spending and production as well as robust jobs figures in recent months, but stated that it remained “highly attentive” to inflationary risks. These statements sparked a sell-off in US Treasuries, driving the US 10-year benchmark Treasury yield to the unprecedented 4% level in secondary market trading. Elsewhere around the world, the Bank of England took a more dovish tone as it announced that it would begin temporarily buying back long-dated bonds to calm the market. Investors had reacted negatively to the British government’s latest fiscal policy announcements. On a monthly basis, the 10-year US Treasury yield rose 48 basis points to close at the 3.83% level.

In the local economic space, inflation for the month of August rose by 6.3% year-on-year, slightly lower than the 6.4% in July. Prices for food and fuel remained elevated as supply side pressures persisted. Consequently, the Bangko Sentral ng Pilipinas hiked rates by another 50 basis points to 4.25%. It likewise revised upward its local inflation forecasts for 2022 to 2024. The central bank will continue to monitor economic data and adjust policy settings as needed.

Fund Performance. The Fund returned 0.00% in August, below its benchmark by 25 basis points.

Fund Strategy. The Fund will maintain its duration of less than 1. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
