OUTLOOK AND STRATEGY

Market Review. Global equity markets declined in August as the global economy continued to face the effects of high inflation. Markets started the month on a positive note as investors priced in a slowing Fed hiking cycle due to below-expectations US inflation print. Later in the month, markets detracted after global central banks, including the Federal Reserve and the European Central Bank, signaled more monetary tightening policies. The technology sector underperformed broad equity markets as the MSCI ACWI Information Technology Index returned -5.7% in USD. Broad sector products and services is seeing a slowdown in demand as uncertainty on geopolitics, inflation and rising interest rates remain.

Fund Performance. The fund returned -2.29% in August, outperforming the benchmark by 336 basis points. Allocation in the internet sub-sector and cash helped performance.

Fund Strategy. The recent concerns over rising interest rates and higher inflation have put pressure on technology stocks. This sentiment may persist due to geopolitical risk from the ongoing Russia-Ukraine conflict but the technology sector continues to be underpinned by strong fundamentals and powerful, long-term secular growth drivers. The secular growth trends driving technology are multi-year transformations that are expected to persist, regardless of the macroeconomic environment or geopolitical risk. The fund will continue to focus on these long-term secular themes, such as artificial intelligence, cloud computing, electric vehicles, metaverse and quantum computing.
