## OUTLOOK AND STRATEGY

**Market Review.** Global equities extended its decline in February due to expectations of tightening monetary policy by central banks and geopolitical tensions between Russia and Ukraine. Surprise hawkish moves by the European Central Bank and Bank of England raised investor concerns that monetary policy tightening will be more aggressive than expected. Meanwhile, geopolitical tensions escalated towards the end of the month as Russia invaded Ukraine. As a result, US and NATO allies imposed severe and immediate economic sanctions on Russia, effectively excluding the nation from the global financial system. Global economic data continue to be strong but inflationary pressures remained elevated. US and Eurozone PMIs still signal a strong expansion in business activity while US jobs data strengthened as non-farm payrolls increased by 467,000 jobs, beating estimates. US headline inflation was 7.5% year-on-year, its fastest pace in four decades driven by the surge in energy prices. In commodity markets, economic sanctions on Russia and continued supply shortages drove energy prices even higher. Brent crude oil prices topped \$100 per barrel amid expectations that sanctions would restrict the supply of the commodity.

**Fund Performance.** The fund returned -2.78% in February, outperforming the benchmark by 170 basis points.

**Fund Strategy.** The recent concerns over rising interest rates and inflation have put pressure on technology stocks in the short-term, but the technology sector continues to be underpinned by strong fundamentals and powerful, long-term secular growth drivers. The Fund will continue to focus on long-term secular trends, which are multi-year transformations that the team expects to persist, regardless of the pace of the reopening or moves in interest rates. The fund will maintain its exposure to trends whose pace of adoption have accelerated due to social distance and migration to remote work, such as cloud computing, e-commerce and gaming.
