OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange (PSEi) came out with a strong performance in August, rising by 4.2% month-on-month (MoM). The rally was propelled by impressive 2Q earnings reports which reflected the strength of the country's economic reopening story. The US Inflation for July came out lower-than-expected at 8.5% likewise lifted sentiment. Meanwhile, the Philippines 2Q GDP came out at 7.4% year-on-year (YoY), lower than prior period's 8.2% YoY. The Bangko Sentral ng Pilipinas (BSP) raised its key benchmark rate by 50 basis points to 3.75% following strong 2Q GDP and PH inflation at 6.4%. The local bourse rose by as much as 8.68% before it succumbed to profit-taking towards the latter part of the month. A quarterly rebalancing from MSCI further amplified the selling pressure with roughly US\$10 million worth of outflows for the Philippines. The PSEi closed at 6,583.65.

Trading volume ramped up in August boosted by the MSCI quarterly rebalancing. The Average Daily Turnover registered at US\$ 138 mil or 53.3% higher compared to July. Meanwhile, foreign selling continued for the 6th straight month at US\$152 mil. Despite the large foreign outflow, there was a 5-days net foreign buying streak at roughly US\$58 mil. Foreign participation stretched to 45% from 41%.

In terms of individual stock performances, top contributors for the month were: JFC (+19.09%), MONDE (+15.87%) and ALI (+13.47%) while the laggards include MER (-11.41%), ACEN (-10.39%) and SMC (-9.43%).

Fund Performance. The fund outperformed its benchmark by 25 basis points in August with a return of 4.49%.

Fund Strategy. The Fund will continue to be defensive given the elevated volatility from the usual risks - high inflation & interest rate and local currency depreciation, augmented by low volume trading. The fund will look to trim on stocks that have already priced-in the recovery story and accumulate on emerging value in select sectors.
