OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) kicked off the year on a strong note, rising by 3.4% to 7,361.65 to end January. However, the road was not without any bumps as the world anticipated the US Federal Reserve Tapering and as the country grappled with fast-spreading Omicron. The latest surge prompted the government to tighten restrictions to Alert Level 3 – with a more limited capacity. However, with a large number of the population already vaccinated, especially in the National Capital Region, Omicron quickly peaked, and recovery ensued fast. Towards the latter part of the month, the local bell-weather index rebounded as cases started to subside coupled with continued vaccination -particularly the booster roll-out. The government then eased its restrictions especially on international travel where incoming inbound travelers were permitted entry without requiring them to undergo a facility-based quarantine. Market players also cheered on the news of 4Q21 GDP where it rose by 7.7%.

In terms of market activity, volume was thin as investors remained on the sidelines amidst the Omicron surge. Average Daily Turnover declined by 49.1% to US\$118.6 million. For foreign activity, foreigners were net sellers, registering an outflow of US\$56 million. January was a quiet month with foreign participation dipping to 35% from 45% in December 2021.

In terms of individual stock performance, the PSEi names were split almost equally with 15 gainers and 14 losers. The main advancers were: AP (+18.86%), JGS (+17.92%) and AEV (+15.70%). Meanwhile, the top laggards include: RRHI (-13.76%), ACEN (-13.27%) and SECB (-9.92%)

Fund Performance. The fund underperformed its benchmark by 36 basis points in January with a return of 3.00%.

Fund Strategy. We remain strategic long-term buyers of Philippine equities on the back of economic recovery, favoring quality names and position on cyclical. We will continue to be nimble and take advantage of tactical opportunities.
