OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) surged in November tracking global markets rally. Investors cheered on a slower US Inflation print and signal from the US Federal Reserve of a slower pace in its rate hikes. On the domestic space, key forces that helped lift risk appetite are as follows: (1) a strengthening Philippine Peso which closed at Php56.80/US\$; (2) upbeat 3Q2022 corporate earnings results where PSEi earnings growth went up by 42% YoY vs 40% YoY in 2Q2022 and; (3) strong 3Q GDP which came out higher-than-expected at 7.6%. The PSEi jumped by 10.2% to close at 6,780.78.

Trading volume remained lackluster for the month with the exception on the MSCI Rebalancing towards the close. Average Daily Value Turnover recorded at US\$117.50 million or 24.2% lower month-on-month. Meanwhile, foreigners became net buyers for the month, a feat that had not occurred since February. Net Foreign Buying registered at US\$99.4 million with foreign participation at 50%.

For the individual stock performances, the top index gainers for the month include: CNVRG (+25.49%), ALI (+23.53%) and ICT (+18.50%). Meanwhile, the bottom index performers are as follows: MER (-7.10%), MPI (-5.46%) and SCC (-3.72%).

Fund Performance. The fund outperformed its benchmark by 14 basis points in November with a return of 10.34%.

Fund Strategy. The Fund will maintain its defensive stance until volatility in the global markets subsides. Risk factors such as elevated interest rate and inflation, global recession fears, geopolitical risks coupled with low-volume trading will continue to put pressure on equity assets. However, we will take advantage of excessive market corrections to rebalance on quality names.
