OUTLOOK AND STRATEGY

Market Review. The Philippines Stock Exchange Index (PSEi) dove deep to end the quarter on global market turbulence as the US Fed raised interest rates anew and pledged further rate hikes. The US Federal Reserve (The Fed) raised policy rates by 75 basis points to 3.25% to fight inflation. The Bangko Sentral ng Pilipinas (BSP) followed suit by delivering a 50-basis point hike in its key policy rates to 4.25%. Moreover, the weakness of the Philippine Peso further pulled market sentiment after depreciating by 4.25% to PHP58.65/US\$ at end-September. The PSEi closed September at 5,741.07 or 12.8% lower on a month-on-month basis.

Trading volume withered with Average Value Turnover registering only at US\$109 million – or 21% lower than the previous month. Meanwhile, foreign selling was recorded at US\$216 million. On a year-to-date basis, net foreign outflows ballooned to US\$1.224 billion.

In terms of individual stock performances, these are the top three performers for the month of September: WLCON (+6.68%), SMC (+2.51%) and AP (-1.60%). Meanwhile, the bottom three performers are as follows: (-26.18%) MONDE, AC Energy (-25.33%) and CNVRG (-24.71%).

Fund Performance. The fund underperformed its benchmark by 10 basis points in September with a return of -12.90%.

Fund Strategy. The Fund will remain in defensive mode amidst the global market turbulence. Global rate hikes, high inflation and local currency depreciation amplified by low volume trading will continue to pressure equity assets. The fund will continue to trim on stocks that have already priced-in the recovery story and accumulate on emerging value in select sectors.
