OUTLOOK AND STRATEGY

Market Review: The BPI Government Bond Index returned -1.93% in February, with benchmark government yields rising 50 basis points (bps) on average. Average daily trading volume fell to 14.01bn from January's PHP17.17bn with trades mostly seen on the short-end (1 month to 3-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held two FXTN auctions (4- and 10-year tenors) and four Treasury Bill auctions in February. Average rates of the fully awarded 4-year and 10-year FXTN auctions were 4.09% and 5.09%. The BTr also announced a 5-year Retail Treasury Bond (RTB) issuance, cancelling the two remaining FXTN auctions for the month. The 5-year paper was awarded at a coupon of 4.875% with a total size of 457.7 billion. The March auction schedule was released with five FXTN issuances (3-, 4-, 10- and two 7-year tenors) and four Treasury Bill auctions.

In the local economic space, the Philippines Statistics Authority (PSA) began adopting 2018 prices as the base year for inflation figures starting 2022. As a result, January inflation further eased to 3.0% year-on-year, primarily driven by slower food inflation and cheaper utility costs. The Bangko Sentral ng Pilipinas (BSP) kept the policy rate at its record 2% low during their February meeting while raised its inflation forecast for 2022 to 3.7% from 3.4%. With the slowdown of daily cases rose and positivity rate, Metro Manila and other cities reverted back to Alert Level 2 lockdown for February.

Fund Performance: The Fund returned -0.81% during the month, above its benchmark by 111 basis points.

Fund Strategy: The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. Though inflation remains to be within the government's target range, the BSP remains vigilant in monitoring global supply side pressures which may push energy prices higher. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
