OUTLOOK AND STRATEGY

Market Review: The BPI Government Bond Index lost 2.44% in September, with benchmark government yields rising by 74.12 basis points (bps) on average. Average daily trading volume fell to PHP10.62 billion from August's PHP14.46 billion with trades mostly seen on the belly (5- to 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in September. Of the four, only two were awarded. The reissuance of the 10-year FXTN1069 and the 7-year FXTN767 were both fully awarded at average yields of 6.703% and 6.588%, respectively, while the reissuance of 3.5-year FXTN301 and the 16-year FXTN2023 were both rejected. Participation across all auctions was mostly healthy, though the BTr opted to reject bids that were deemed too high, especially as it had just concluded a substantial Retail Treasury Bond issuance earlier during the month. Towards the end of the month, the October auction schedule was released with four FXTN issuances (3-, 6-, 10-, and 13-year tenors) and four Treasury Bill auctions.

In the local economic space, inflation for the month of August rose by 6.3% year-on-year, slightly lower than the 6.4% in July. Prices for food and fuel remained elevated as supply side pressures persisted. Consequently, the Bangko Sentral ng Pilipinas hiked rates by another 50 basis points to 4.25%. It likewise revised upward its local inflation forecasts for 2022 to 2024. The central bank will continue to monitor economic data and adjust policy settings as needed.

Fund Performance: The Fund returned -1.65% during the month, above its benchmark by 78 basis points.

Fund Strategy: The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. With inflation having exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
