## OUTLOOK AND STRATEGY

**Market Review.** The BPI Money Market Index returned flat in May, while benchmark short-term government yields rose 16 basis points (bps) on average. Average daily trading volume fell to PHP10.89bn from April's PHP14.67bn with trades mostly seen on the short-end (3-month to 1-year papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in May. The 182-day and 364-day papers were repeatedly rejected by the BTr as yields inched higher throughout the month amid rate hike expectations. Average rates for the last awarded auction of the 91-day paper and 182-day paper were at 1.6% and 1.892%, while the 364-day paper was rejected. Towards month-end, the BTr released its May auction schedule, announcing five FXTN issuances (3-, 5-, 10-, and two 7-year tenors) and four Treasury Bill auctions.

In the local economic space, the Philippine economy grew 8.3% year-on-year for the first quarter of 2022 as mobility restrictions eased following the surge of COVID19 Omicron cases earlier this year. April inflation moved past the BSP's 2-4% inflation target reaching 4.9% year-on-year, primarily driven by food, transport and utility costs. The Bangko Sentral ng Pilipinas (BSP) hiked its policy rates by 25 basis points to fight price pressures driven by war in Europe and supply chain disruptions. Moreover, the BSP revised its inflation forecast upward for 2022 and 2023 to 4.6% and 3.9%, respectively.

**Fund Performance.** The Fund returned 0.87% during the month, above its benchmark by 77 basis points.

**Fund Strategy.** The Fund continues to maintain its holdings in short duration government securities. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
