**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

**Equity Price Risk:** Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned 1.24% in December, with benchmark government yields falling 17 basis points (bps) on average. Average daily trading volume fell to PHP9.65 billion from November's PHP11.35 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) only held two FXTN auctions in December. The reissuance of the 5-year FXTN 20-14 and the 12-year FXTN 25-6 were fully awarded at average yields of 6.568% and 7.189%, respectively. The BTr cancelled the last scheduled 20-year FXTN auction which spurred a short market rally. Towards the end of the month, the BTr released the January auction schedule with four Treasury Bill auctions and four FXTN issuances (7-, 13-, 20- and 10-year tenors).

The local inflation for the month of November rose by 8.0% year-on-year, its highest level in 14 years. The spike is mainly attributed to elevated food and fuel prices amid weather disturbances and supply side pressures. Consequently, the BSP hiked rates by another 50 basis points during their last policy meeting for 2022 held mid-month. In addition, the BSP inflation forecast was adjusted to 4.5% from 4.3% for 2023. BSP officials continued to reiterate that they remained prepared to raise rates as needed, given persistently high CPI levels, as well as central bank policy tightening measures globally.

The Philippine Stock Exchange Index (PSEi) declined at the end of the year as foreign selling resumed following consecutive months of foreign inflows. Renewed concerns on elevated global interest rates and inflation were triggered by US Federal Reserve (FED) Chair Jerome Powell's announcement during the conclusion of its FOMC meeting that more data is needed for the FED to change its view on US inflation. This means that the FED is expected to keep rates higher throughout 2023 with no possible reduction until year 2024. On the local front, the Bangko Sentral ng Pilipinas (BSP) increased overnight borrowing rate by 50 basis points (bps) to 5.5%, the highest since November 2008. The PSEi gave up 3.2% to close at 6,566.39 in December

Trading volume ramped up in December, with Average Daily Value Turnover at US\$222 million or 86.5% higher month-on-month. Meanwhile, in terms of foreign activity, the market saw Net Foreign Outflows at US\$109 million. PLDT was the top stock sold in December with US\$40 million worth of foreign outflow and accounted for 30% of the market's overall decline. This was due to reports and admission that the telecommunications firm had overspent as much as Pphp48 billion on capex.

For the individual stock performances, the top index gainers for the month include: AGI (+21.80%), ACEN (+7.17%) and MER (+6.71%). Meanwhile, the bottom index performers are as follows: TEL (-24.83%), MONDE (-12.34%) and MEG (-10.71%).

**Fund Performance.** The Fund registered a loss of 1.57% in December, below the benchmark by 64 bps. Year-to-date, the Fund registered a loss of 4.43%, outperforming the benchmark by 112 bps.

**Fund Strategy.** The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. With inflation having exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will maintain its defensive stance until volatility in the global markets subsides. Risk factors such as elevated interest rate and inflation, global recession fears, geopolitical risks coupled with low-volume trading will continue to put pressure on equity assets. However, we will take advantage of excessive market corrections to rebalance on quality names.
