INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve long-term capital and income growth by investing in a diversified portfolio of fixed income and equity securities. The Fund aims to outperform its benchmark, which is composed of 50% BPI Philippine Government Bond Index and 50% Philippine Stock Exchange Index.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Diversified Balanced Fund is suitable for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon at least five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

- **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORP. (PDIC).**

*Related party in accordance with BPI AMTC's internal policy.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.25% in January, with benchmark government yields falling 3.13 basis points (bps) on average. Average daily trading volume rose to PHP17.168bn from December's PHP14.880bn with trades mostly seen on the short-end (3 months to 3-year papers) and belly (7-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions (4-, 10- and two 7-year tenors) and four Treasury Bill auctions in January. The first FXTN auction of the year, a 7-year reissuance, was rejected by BTr. However, demand on FXTN auctions picked up through the month as market became flushed with liquidity following large FXTN maturities in January. Average rates of the 4-year and second 7-year auctions were 4.012% and 4.689%, while the 10-year new issuance was awarded at coupon of 4.875%. The BTr also released its February auction schedule, announcing four FXTN issuances (4-, 7- and two 10-year tenors) and four Treasury Bill auctions.

In the local economic space, December inflation further eased to 3.6% year-on-year, primarily driven by slower food inflation and transport inflation. Full-year inflation averaged to 4.5% breaching the Bangko Sentral ng Pilipinas (BSP)'s 4.4% target for 2021. 4Q GDP data came out at 7.7%, well-above the expected 6.3%, lifting the full-year 2021 growth to 5.6%. The 4Q GDP growth figure was driven by household consumption as falling Covid-19 daily infection rates in December helped spur spending during the holiday season. Post-holiday celebrations however, daily cases rose and positivity rate reached its peak resulting in Metro Manila and other cities raising to Alert Level 3 lockdown for January.

The Philippine Stock Exchange Index (PSEi) kicked off the year on a strong note, rising by 3.4% to 7,361.65 to end January. However, the road was not without any bumps as the world anticipated the US Federal Reserve Tapering and as the country grappled with fast-spreading Omicron. The latest surge prompted the government to tighten restrictions to Alert Level 3 – with a more limited capacity. However, with a large number of the population already vaccinated, especially in the National Capital Region, Omicron quickly peaked, and recovery ensued fast. Towards the latter part of the month, the local bell-weather index rebounded as cases started to subside coupled with continued vaccination -particularly the booster roll-out. The government then eased its restrictions especially on international travel where incoming inbound travelers were permitted entry without requiring them to undergo a facility-based quarantine. Market players also cheered on the news of 4Q21 GDP where it rose by 7.7%.

In terms of market activity, volume was thin as investors remained on the sidelines amidst the Omicron surge. Average Daily Turnover declined by 49.1% to US\$118.6 million. For foreign activity, foreigners were net sellers, registering an outflow of US\$56 million. January was a quiet month with foreign participation dipping to 35% from 45% in December 2021.

In terms of individual stock performance, the PSEi names were split almost equally with 15 gainers and 14 losers. The main advancers were: AP (+18.86%), JGS (+17.92%) and AEV (+15.70%). Meanwhile, the top laggards include: RRHI (-13.76%), ACEN (-13.27%) and SECB (-9.92%)

Fund Performance. The Fund registered a gain of 2.03% in January, outperforming the benchmark by 22 bps.

Fund Strategy. The Fund looks to maintain a neutral duration position given expectations of accelerating local inflation amid higher food prices and dwindling base effects compared to prior months. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

We look to remain strategic long-term buyers of Philippine equities, hinging on a more concrete reopening narrative post-vaccination. We favor quality names or position on cyclicals. We will continue to be nimble and buy on market dips.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- (a) Bank deposits and such other investments allowed under regulations issued by the BSP;
- (b) Securities issued by or guaranteed by the Philippine government, or by the BSP;
- (c) Tradable securities issued or guaranteed by multilateral institutions such as the Asian Development Bank (ADB), International Monetary Fund (IMF) and World Bank;
- (d) Tradable securities issued by the government of a foreign country, any political subdivision of a foreign country or any supranational entity;
- (e) Exchange-listed securities;
- (f) Marketable instruments that are traded in an organized exchange;
- (g) Loans traded in an organized market; and
- (h) Such other tradable investments outlets/categories as may be approved by the relevant authority and allowed by the BSP.
