OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 1.39% in July, with benchmark government yields falling 18 basis points (bps) on average. Average daily trading volume rose to PHP14.95bn from June's PHP8.35bn with trades mostly seen on the belly (5-year and 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions and four Treasury Bill auctions in July. The re-issuance of the 4-year FXTN 7-62, 7-year FXTN 10-64, 10-year FXTN 10-68, and 14-year FXTN 25-8 were fully awarded at average rates of 5.908%, 6.76%, 6.865%, and 6.894%. Healthy participation was observed across all tenors. Towards the end of the month, the August auction schedule was released with four FXTN issuances (3.5-, 7-, 10-, and 5.5-year tenors) and five Treasury Bill auctions.

In the local economic space, June inflation rose by 6.1% year-on-year, the fastest pace since November 2018. This was on the back of rising food and fuel costs, as geopolitical tensions continue to keep oil prices elevated. Consequently, the BSP surprised markets, raising policy rates mid-month by 75 basis points to 3.25%. This was the largest single rate hike in history, and was also the first off-cycle move since the pandemic began in 2020. The central bank will continue to monitor economic data and adjust policy settings as needed.

The Philippine Stock Exchange Index (PSEi) bounced back in July following a steep decline in June. Both local and global economic developments rattled investors at the early part of the month on persisting concerns of inflation (came in at 6.1% in June) and peso depreciation (rising above the Php56 level). Then, the Bangko Sentral ng Pilipinas (BSP) announced an off-cycle interest rate hike, increasing key policy rates by 75 basis points. Similarly, U.S inflation continued to rise (at 9.1% in June) and the US Federal Reserve subsequently raised its target Fed Fund Rates by another 75 basis points. However, bargain-hunting ensued towards the latter part of the month on renewed optimism following lower commodity prices and a slowdown US consumer spending and production data which suggest that inflation may have already peaked. The latter could lead to a less aggressive rate hikes by the US Federal Reserve. The Philippine Stock Exchange Index closed at 6,315.93 or 2.61% higher month-on-month

In terms of market activity, lack-luster trading continued with the average daily turn-over at US\$90 million or 16.7% lower month-on-month. Meanwhile, net foreign selling persisted for the 5th straight month at US\$ 80 million. Foreign participation came in at 41%, lower than 44% in June.

In terms of individual stock performances, top contributors for the month include: AEV (+19.98%), WLCON (+16.18%) and AGI (+12.39%) while the laggards were CNVRG (-10.17%), GLO (-9.08%) and GTCAP (-7.28%).

Fund Performance. The Fund registered a gain of 1.78% in July, below the benchmark by 25 bps. Year-to-date, the Fund registered a loss of 6.24%, outperforming the benchmark by 105 bps.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. With inflation having exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will remain defensive given the elevated volatility from higher inflation print, weak peso and accelerated global tightening. The fund will look to trim on names that have already priced-in the recovery story and accumulate on emerging value in select sectors.
