KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.64% in March, with benchmark government yields rising 27 basis points (bps) on average. Average daily trading volume fell to PHP13.83bn from February's PHP14.01bn with trades mostly seen on the short-end (3-month to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions and four Treasury Bill auctions in March. The new issuance of 3-year and 7-year FXTN papers, were fully rejected by the BTr. On the other hand, the re-issuance of the 4-year FXTN 5-77 and 7-year FXTN 7-65 were partially awarded at average rates of 4.669% and 5.601%, while the 10-year FXTN 10-67 was fully awarded at an average rate of 6.092%. The April auction schedule was released with four FXTN issuances (3-, 4-, 7-, and 10-year tenors) and four Treasury Bill auctions amounting to PHP200 billion.

February inflation figure stayed at 3.0% year-on-year, primarily driven by slower food inflation and upside pressures coming from utilities and transport. The Bangko Sentral ng Pilipinas (BSP) kept the policy rate steady at 2% during their March meeting while raising its last month's forecast to 4.3% from 3.7% for full year 2022 inflation and 3.6% from 3.3% for 2023. BSP Governor Diokno said the central bank is keenly aware that inflation will likely remain elevated due to domestic and global supply side pressures. With daily new cases of Covid-19 slowing down, Metro Manila and other cities eased to Alert Level 1 lockdown for March allowing full capacity in establishments and public transportation.

The Philippine Stock Exchange Index (PSEi) tumbled to end quarter number 1 as global markets took blows from the Russia-Ukraine conflict. The index dropped sharply, overshooting the 7,000 mark in early March, on fears of soaring commodity and oil prices. When the index reached the oversold area, bargain-hunting ensued and it leapt to close at 7,203.47 in March.

In terms of activity, the month of March was less active with Average Daily Turnover registering at US\$164 million or 12.8% lower month-on-month. On the foreign activity side, foreigners continued to be sellers with outflows at US\$205 million and with significant participation level at 48%. This brought the year-to-date figure at a net outflow of US\$120 million. A notable selling pressure came from FTSE rebalancing which saw the deletion of SM Investments (SM).

As for the individual stock performances, the top contributors for the month were CNVRG (+16.15%), ICT (+6.74%), and RLC (+6.7%). Meanwhile, the laggards for the month include MONDE (-17.07%), ALI (-10.13%) and LTG (-8.06%).

Fund Performance. The Fund registered a loss of 0.91% in March, outperforming the benchmark by 7 bps. Year-to-date, the Fund registered a gain of 1.03%, outperforming the benchmark by 150 bps.

Fund Strategy. The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. Though inflation remains to be within the government's target range, the BSP remains vigilant in monitoring global supply side pressures which may push energy prices higher. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

We look to remain strategic long-term buyers of Philippine equities, hinging on a more concrete reopening narrative post-vaccination. We favor quality names or position on cyclicals. We will continue to be nimble and buy on market dips.
