OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.41% in April, with benchmark government yields rising 17 basis points (bps) on average. Average daily trading volume rose to PHP14.92bn from March's PHP13.83bn with trades mostly seen on the short-end (6-month to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions and four Treasury Bill auctions in April. Three out of the four FXTN auctions (3-, 5- and 10-year) were only partially awarded as investors continued to bid at higher levels in anticipation of rising global yields. Only the 7-year auction, a re-issuance of FXTN7-65 was fully awarded, with average yield at 5.779%, roughly 17 basis points higher than the prior month's reissuance of the same paper. The May auction schedule was released with four FXTN issuances (3-, 5-, 7-, and 10-year tenors) and four Treasury Bill auctions amounting to PHP200 billion.

March headline inflation rose to a 6-month high of 4.0% year-on-year, as food, utilities and transportation costs rose in line with global fuel prices as the Russian-Ukraine tensions persisted. The figure was at the higher end of the Bangko Sentral ng Pilipinas' (BSP) target range of 2-4% for the year. The central bank had earlier warned that with fuel costs rising as a consequence of geopolitical tensions, Philippine inflation could breach the target before the end of the second quarter. The BSP shall continue to monitor emerging risks to the outlook for inflation and growth, and adjust policy settings as needed.

The Philippine Stock Exchange just experienced its largest monthly drop thus far in 2022 on a confluence of external and internal factors. Ongoing geopolitical tensions between Russia and Ukraine, US Federal Reserve well-anticipated rate-hike, rising commodity prices and China's lockdown to curb the rising COVID-19 cases, forced market investors to pull out on risky assets and stay on the sidelines. On the domestic front, the BSP hinted at raising policy rates if GDP grows around 6-7%. Moreover, all eyes on the 2022 national elections as new leaders will take the helm for the next 6 years. The local bell-weather index gave up 6.6% month-on-month to close at 6,731.25 in April.

We saw lackluster activity as Average Daily Turnover registered at US\$102.61 million in April or 37.4% lower in the prior month. On foreign flows, we saw another round of Net Outflows at US\$99 million. These were across the board which could have recorded at US\$154.8 if not for the AREIT overnight secondary share placement at US\$55.8 million inflows. Year-to-date, Net Foreign Outflows expanded to US\$219 million.

As for the individual stock performances, top contributors in April were EMP (+39.1%), WLCON (+3.7%) and TEL (+0.86%) while the laggards include ACEN (-17.30%), URC (-15.29%) and AEV (-14.96%).

Fund Performance. The Fund registered a loss of 2.42% in April, underperforming the benchmark by 15 bps. Meanwhile, the YTD performance of the Fund reported a loss of 2.77%, outperforming its benchmark by 65 bps.

Fund Strategy. The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. Though inflation remains to be within the government's target range, the BSP remains vigilant in monitoring global supply side pressures which may push energy prices higher. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

We will stay on the sidelines pending a domestic rate hike, elevated global commodity prices and other financial shocks from Europe. Moreover, we continue to be nimble and ready for any tactical opportunities.
