KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -1.29% in October, with benchmark government yields rising 45 basis points (bps) on average. Average daily trading volume fell to PHP7.04 billion from September's PHP11.22 billion with trades mostly seen on the short end (3- to 6-month papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in October. The new issuance of the 10-year FXTN 10-70 was fully awarded with a coupon rate of 7.500%, while the reissuance of the 13-year FXTN 25-7 was fully awarded at an average rate of 7.887%. However, the reissuance of the 3-year FXTN 7-61 and the 6-year FXTN 7-68 were both partially awarded at average yields of 5.746% and 7.000%, respectively. As market participants bid higher pricing in rate hike expectations, the BTr awarded some bids above the secondary market rates. Towards the end of the month, the BTr released the November auction schedule with four Treasury Bill auctions and four FXTN issuances (3-, 5-, 12-, and 20-year tenors), offering the first 20-year paper for the year.

In the local economic space, inflation for the month of September rose by 6.9% year-on-year, its highest level in four years. Prices for food, fuel, and utilities remained elevated as supply side pressures persisted. Given the persistent price pressures and the current pace of FED rate hikes, BSP Governor Felipe Medalla remained hawkish with a remark of a possibility of more than 100-bp hike in the last 2 policy meetings for the year.

The Philippine Stock Exchange Index (PSEi) rallied in October on bargain-hunting after a steep decline in September. The PSEi's positive performance also tracked US stocks rally given better-than-expected 3Q earnings report and the hope that the US Federal Reserve (Fed) will slow the pace of its tightening. Cooling US housing market and decelerating manufacturing growth are few of the economic data that the Fed will definitely take into consideration. The PSEi rose by 7.2% to close at 6,153.43

Trading volume remained thin as many expected with Average Daily Value Turnover coming in at US\$ 155 million or 32% lower than the prior month. Meanwhile, foreigners continued to be net sellers at US\$11.6 million for October. This has stretched the year-to-date Net Foreign Selling to US\$ 1.24 billion.

For the individual stock performances, the top index gainers for the month include: MER (+14.60%), GLO (+14.38%) and BDO (+14.17%). Meanwhile, the bottom index performers were: SCC (-10.38%), RLC (-9.95%) and WLCON (-8.14%).

Fund Performance. The Fund registered a gain of 1.17% in October, underperforming the benchmark by 5 bps. Meanwhile, the YTD performance of the Fund reported a loss of 7.32%, outperforming its benchmark by 83 bps.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will maintain its defensive stance given the persisting volatility in the global markets. Global rate hikes, high inflation and local currency depreciation coupled with low-volume trading will continue to apply pressure on equity assets. Likewise, the fund will prefer defensive names (high dividend yielding stocks). Tactically, the fund will take advantage of price swings – raising cash on rallies and buying on dips.
