KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index lost 2.44% in September, with benchmark government yields rising by 74.12 basis points (bps) on average. Average daily trading volume fell to PHP10.62 billion from August's PHP14.46 billion with trades mostly seen on the belly (5- to 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in September. Of the four, only two were awarded. The reissuance of the 10-year FXTN1069 and the 7-year FXTN767 were both fully awarded at average yields of 6.703% and 6.588%, respectively, while the reissuance of 3.5-year FXTN301 and the 16-year FXTN2023 were both rejected. Participation across all auctions was mostly healthy, though the BTr opted to reject bids that were deemed too high, especially as it had just concluded a substantial Retail Treasury Bond issuance earlier during the month. Towards the end of the month, the October auction schedule was released with four FXTN issuances (3-, 6-, 10-, and 13-year tenors) and four Treasury Bill auctions.

In the local economic space, inflation for the month of August rose by 6.3% year-on-year, slightly lower than the 6.4% in July. Prices for food and fuel remained elevated as supply side pressures persisted. Consequently, the Bangko Sentral ng Pilipinas hiked rates by another 50 basis points to 4.25%. It likewise revised upward its local inflation forecasts for 2022 to 2024. The central bank will continue to monitor economic data and adjust policy settings as needed.

The Philippines Stock Exchange Index (PSEi) dove deep to end the quarter on global market turbulence as the US Fed raised interest rates anew and pledged further rate hikes. The US Federal Reserve (The Fed) raised policy rates by 75 basis points to 3.25% to fight inflation. The Bangko Sentral ng Pilipinas (BSP) followed suit by delivering a 50-basis point hike in its key policy rates to 4.25%. Moreover, the weakness of the Philippine Peso further pulled market sentiment after depreciating by 4.25% to PHP58.65/US\$ at end-September. The PSEi closed September at 5,741.07 or 12.8% lower on a month-on-month basis.

Trading volume withered with Average Value Turnover registering only at US\$109 million – or 21% lower than the previous month. Meanwhile, foreign selling was recorded at US\$216 million. On a year-to-date basis, net foreign outflows ballooned to US\$1.224 billion.

In terms of individual stock performances, these are the top three performers for the month of September: WLCON (+6.68%), SMC (+2.51%) and AP (-1.60%). Meanwhile, the bottom three performers are as follows: (-26.18%) MONDE, AC Energy (-25.33%) and CNVRG (-24.71%).

Fund Performance. The Fund registered a loss of 5.40% in September, outperforming the benchmark by 22 bps. Meanwhile, the YTD performance of the Fund reported a loss of 8.39%, outperforming its benchmark by 87 bps.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

The Fund will remain in defensive mode amidst the global market turbulence. Global rate hikes, high inflation and local currency depreciation amplified by low volume trading will continue to pressure equity assets. The fund will continue to trim on stocks that have already priced-in the recovery story and accumulate on emerging value in select sectors.
