KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -1.93% in February, with benchmark government yields rising 50 basis points (bps) on average. Average daily trading volume fell to 14.01bn from January's PHP17.17bn with trades mostly seen on the short-end (1 month to 3-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held two FXTN auctions (4- and 10-year tenors) and four Treasury Bill auctions in February. Average rates of the fully awarded 4-year and 10-year FXTN auctions were 4.09% and 5.09%. The BTr also announced a 5-year Retail Treasury Bond (RTB) issuance, cancelling the two remaining FXTN auctions for the month. The 5-year paper was awarded at a coupon of 4.875% with a total size of 457.7 billion. The March auction schedule was released with five FXTN issuances (3-, 4-, 10- and two 7-year tenors) and four Treasury Bill auctions.

In the local economic space, the Philippines Statistics Authority (PSA) began adopting 2018 prices as the base year for inflation figures starting 2022. As a result, January inflation further eased to 3.0% year-on-year, primarily driven by slower food inflation and cheaper utility costs. The Bangko Sentral ng Pilipinas (BSP) kept the policy rate at its record 2% low during their February meeting while raised its inflation forecast for 2022 to 3.7% from 3.4%. With the slowdown of daily cases rose and positivity rate, Metro Manila and other cities reverted back to Alert Level 2 lockdown for February.

Fund Performance. The Fund outperformed its benchmark by 31 basis points, returning -1.62% for the month.

Fund Strategy. The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. Though inflation remains to be within the government's target range, the BSP remains vigilant in monitoring global supply side pressures which may push energy prices higher. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
