**Market Review**. The BPI Government Bond Index returned -0.51% in June, with benchmark government yields rising 24 basis points (bps) on average. Average daily trading volume fell to PHP8.35bn from May's PHP10.89bn with trades mostly seen on the short-end (3-month to 3-year papers) of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions and four Treasury Bill auctions in June. The re-issuance of the 3year FXTN 3-27, 5-year FXTN 7-62, and 7-year FXTN 7-67 were partially awarded at average rates of 4.994%, 5.514% and 6.74%, while the second 7-year FXTN 7-67 auction was fully rejected. The new issuance of the 10-year paper, FXTN 10-68, was partially awarded with a coupon rate of 7.25%. The July auction schedule was released with four FXTN issuances (4-, 7-, 10-, and 14-year tenors) and four Treasury Bill auctions.

In the local economic space, May inflation rose to 5.4% year-on-year from 4.9% in April, well-above central bank's 2-4% inflation target. Higher prices were primarily driven by steep global oil and food prices. The Bangko Sentral ng Pilipinas (BSP) raised its policy rates to 2.5% from 2.25% to rein in continued price pressures driven by war in Europe and supply chain disruptions. Moreover, the BSP revised its inflation forecast upward for 2022 and 2023 to 5% and 4.2%, respectively.

**Fund Performance**. The Fund outperformed its benchmark by 15 basis points, returning -0.36% for the month.

**Fund Strategy**. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
