OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 1.24% in December, with benchmark government yields falling 17 basis points (bps) on average. Average daily trading volume fell to PHP9.65 billion from November's PHP11.35 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) only held two FXTN auctions in December. The reissuance of the 5-year FXTN 20-14 and the 12-year FXTN 25-6 were fully awarded at average yields of 6.568% and 7.189%, respectively. The BTr cancelled the last scheduled 20-year FXTN auction which spurred a short market rally. Towards the end of the month, the BTr released the January auction schedule with four Treasury Bill auctions and four FXTN issuances (7-, 13-, 20- and 10-year tenors).

The local inflation for the month of November rose by 8.0% year-on-year, its highest level in 14 years. The spike is mainly attributed to elevated food and fuel prices amid weather disturbances and supply side pressures. Consequently, the BSP hiked rates by another 50 basis points during their last policy meeting for 2022 held mid-month. In addition, the BSP inflation forecast was adjusted to 4.5% from 4.3% for 2023. BSP officials continued to reiterate that they remained prepared to raise rates as needed, given persistently high CPI levels, as well as central bank policy tightening measures globally.

Fund Performance. The Fund returned 0.54% for the month, below its benchmark by 25 basis points.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
