KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a medium term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.64% in March, with benchmark government yields rising 27 basis points (bps) on average. Average daily trading volume fell to PHP13.83bn from February's PHP14.01bn with trades mostly seen on the short-end (3-month to 1-year papers) and belly (5-year papers) of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions and four Treasury Bill auctions in March. The new issuance of 3-year and 7-year FXTN papers, were fully rejected by the BTr. On the other hand, the re-issuance of the 4-year FXTN 5-77 and 7-year FXTN 7-65 were partially awarded at average rates of 4.669% and 5.601%, while the 10-year FXTN 10-67 was fully awarded at an average rate of 6.092%. The April auction schedule was released with four FXTN issuances (3-, 4-, 7-, and 10-year tenors) and four Treasury Bill auctions amounting to PHP200 billion.

February inflation figure stayed at 3.0% year-on-year, primarily driven by slower food inflation and upside pressures coming from utilities and transport. The Bangko Sentral ng Pilipinas (BSP) kept the policy rate steady at 2% during their March meeting while raising its last month's forecast to 4.3% from 3.7% for full year 2022 inflation and 3.6% from 3.3% for 2023. BSP Governor Diokno said the central bank is keenly aware that inflation will likely remain elevated due to domestic and global supply side pressures. With daily new cases of Covid-19 slowing down, Metro Manila and other cities eased to Alert Level 1 lockdown for March allowing full capacity in establishments and public transportation.

Fund Performance. The Fund returned -0.19% for the month, below its benchmark by 20 basis points.

Fund Strategy. The Fund looks to opportunistically trim duration given expectations of rising interest rates moving forward. Though inflation remains to be within the government's target range, the BSP remains vigilant in monitoring global supply side pressures which may push energy prices higher. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
