OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -1.29% in October, with benchmark government yields rising 45 basis points (bps) on average. Average daily trading volume fell to PHP7.04 billion from September's PHP11.22 billion with trades mostly seen on the short end (3- to 6-month papers) of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in October. The new issuance of the 10-year FXTN 10-70 was fully awarded with a coupon rate of 7.500%, while the reissuance of the 13-year FXTN 25-7 was fully awarded at an average rate of 7.887%. However, the reissuance of the 3-year FXTN 7-61 and the 6-year FXTN 7-68 were both partially awarded at average yields of 5.746% and 7.000%, respectively. As market participants bid higher pricing in rate hike expectations, the BTr awarded some bids above the secondary market rates. Towards the end of the month, the BTr released the November auction schedule with four Treasury Bill auctions and four FXTN issuances (3-, 5-, 12-, and 20-year tenors), offering the first 20-year paper for the year.

In the local economic space, inflation for the month of September rose by 6.9% year-on-year, its highest level in four years. Prices for food, fuel, and utilities remained elevated as supply side pressures persisted. Given the persistent price pressures and the current pace of FED rate hikes, BSP Governor Felipe Medalla remained hawkish with a remark of a possibility of more than 100-bp hike in the last 2 policy meetings for the year.

Fund Performance. The Fund returned -1.06% for the month, above its benchmark by 9 basis points.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
