KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) bounced back in July following a steep decline in June. Both local and global economic developments rattled investors at the early part of the month on persisting concerns of inflation (came in at 6.1% in June) and peso depreciation (rising above the Php56 level). Then, the Bangko Sentral ng Pilipinas (BSP) announced an off-cycle interest rate hike, increasing key policy rates by 75 basis points. Similarly, U.S inflation continued to rise (at 9.1% in June) and the US Federal Reserve subsequently raised its target Fed Fund Rates by another 75 basis points. However, bargain-hunting ensued towards the latter part of the month on renewed optimism following lower commodity prices and a slowdown US consumer spending and production data which suggest that inflation may have already peaked. The latter could lead to a less aggressive rate hikes by the US Federal Reserve. The Philippine Stock Exchange Index closed at 6,315.93 or 2.61% higher month-on-month

In terms of market activity, lack-luster trading continued with the average daily turn-over at US\$90 million or 16.7% lower month-on-month. Meanwhile, net foreign selling persisted for the 5th straight month at US\$ 80 million. Foreign participation came in at 41%, lower than 44% in June.

In terms of individual stock performances, top contributors for the month include: AEV (+19.98%), WLCON (+16.18%) and AGI (+12.39%) while the laggards were CNVRG (-10.17%), GLO (-9.08%) and GTCAP (-7.28%).

Fund Performance. The fund returned 2.48% in July, underperforming the benchmark by 13 bps. Year-to-date, it outperformed the benchmark by 149 basis points with a return of -9.83%.

Fund Strategy. The Fund will remain defensive given the elevated volatility from higher inflation print, weak peso and accelerated global tightening. The fund will look to trim on names that have already priced-in the recovery story and accumulate on emerging value in select sectors.
