**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Equity Price Risk:** The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The Philippines Stock Exchange Index (PSEi) dove deep to end the quarter on global market turbulence as the US Fed raised interest rates anew and pledged further rate hikes. The US Federal Reserve (The Fed) raised policy rates by 75 basis points to 3.25% to fight inflation. The Bangko Sentral ng Pilipinas (BSP) followed suit by delivering a 50-basis point hike in its key policy rates to 4.25%. Moreover, the weakness of the Philippine Peso further pulled market sentiment after depreciating by 4.25% to PHP58.65/US\$ at end-September. The PSEi closed September at 5,741.07 or 12.8% lower on a month-on-month basis.

Trading volume withered with Average Value Turnover registering only at US\$109 million – or 21% lower than the previous month. Meanwhile, foreign selling was recorded at US\$216 million. On a year-to-date basis, net foreign outflows ballooned to US\$1.224 billion.

In terms of individual stock performances, these are the top three performers for the month of September: WLCON (+6.68%), SMC (+2.51%) and AP (-1.60%). Meanwhile, the bottom three performers are as follows: (-26.18%) MONDE, AC Energy (-25.33%) and CNVRG (-24.71%).

**Fund Performance.** The fund returned -11.88% in September, outperforming the benchmark by 92 bps. Year-to-date, it outperformed the benchmark by 242 basis points with a return of -16.98%.

**Fund Strategy.** The Fund will remain in defensive mode amidst the global market turbulence. Global rate hikes, high inflation and local currency depreciation amplified by low volume trading will continue to pressure equity assets. The fund will continue to trim on stocks that have already priced-in the recovery story and accumulate on emerging value in select sectors.
