**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Equity Price Risk:** The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange Index (PSEi) declined at the end of the year as foreign selling resumed following consecutive months of foreign inflows. Renewed concerns on elevated global interest rates and inflation were triggered by US Federal Reserve (FED) Chair Jerome Powell's announcement during the conclusion of its FOMC meeting that more data is needed for the FED to change its view on US inflation. This means that the FED is expected to keep rates higher throughout 2023 with no possible reduction until year 2024. On the local front, the Bangko Sentral ng Pilipinas (BSP) increased overnight borrowing rate by 50 basis points (bps) to 5.5%, the highest since November 2008. The PSEi gave up 3.2% to close at 6,566.39 in December

Trading volume ramped up in December, with Average Daily Value Turnover at US\$222 million or 86.5% higher month-on-month. Meanwhile, in terms of foreign activity, the market saw Net Foreign Outflows at US\$109 million. PLDT was the top stock sold in December with US\$40 million worth of foreign outflow and accounted for 30% of the market's overall decline.

For the individual stock performances, the top index gainers for the month include: AGI (+21.80%), ACEN (+7.17%) and MER (+6.71%). Meanwhile, the bottom index performers are as follows: TEL (-24.83%), MONDE (-12.34%) and MEG (-10.71%).

**Fund Performance.** The Fund registered a loss of 3.09% in December, outperforming its benchmark by 7 bps. Meanwhile, the YTD performance of the Fund reported a loss of 6.63%, outperforming its benchmark by 118 bps.

**Fund Strategy.** The Fund will maintain its defensive stance until volatility in the global markets subsides. Risk factors such as elevated interest rate and inflation, global recession fears, geopolitical risks coupled with low-volume trading will continue to put pressure on equity assets. However, we will take advantage of excessive market corrections to rebalance on quality names.
