KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) had quite a swing in the 2nd month of 2022. The local bell-weather index managed to reach the 7,500 level earlier in February as the country saw a recovery from the OMICRON variant surge in January. The government eased restrictions and shifted to the lowest classification or Alert level 1 effective March first. Geopolitical tensions took the spotlight as Russia shocked the world following its “special military operation” or invasion of its neighbor country – Ukraine. The earlier gains of the index were pared and it ended 0.7% lower on a month-on-month basis to 7,311.01.

The local equities market saw more activity, with average daily turnover registering at US\$188 million in February or 58.6% higher compared to January. Meanwhile, Foreigners were net buyers after recording a Net Inflow worth US\$141 million on re-opening optimism of the country amidst the improving COVID-19 cases. They were seen buying cyclicals particularly SMPH and ALI as these stocks yielded inflows of US\$55.4 million and US\$38.9 million, respectively.

In terms of performance, telecommunications sector was the biggest underperformer for the month. GLO (-17.43%) and CNVRG (-15.17%) were 2 of the 3 biggest laggards in the PSEi along with consumer stock, EMP (-18.65%). Meanwhile, the main advancers include: SMPH (+13.39%), MER (+9.85%) and SECB (+8.86%).

Fund Performance. The Fund registered a loss of 0.46% in February, outperforming its benchmark by 23bps. Meanwhile, the YTD performance of the Fund reported a gain of 2.95%, outperforming its benchmark by 31 bps.

Fund Strategy. We look to stay on the sidelines as high volatility from geopolitical tensions intensifies. We will adopt a defensive stance and take advantage of names primed to benefit during the dividend season (between Feb to April). However, we will remain nimble and be ready for any potential tactical opportunities that may come.
