KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) kicked off the year on a strong note, rising by 3.4% to 7,361.65 to end January. However, the road was not without any bumps as the world anticipated the US Federal Reserve Tapering and as the country grappled with the fast-spreading Omicron. The latest surge prompted the government to tighten restrictions to Alert Level 3 – with a more limited capacity. But with a large number of the population already vaccinated particularly in the National Capital Region, Omicron quickly peaked and recovery ensued. Towards the latter part of the month, the government decided to ease its restrictions back to Alert level 2 beginning 1st of February. Notable change was on international travel where incoming inbound travelers were permitted entry without requiring to undergo a facility-based quarantine. Moreover, the release of the 4Q21 GDP where it rose 7.7% was well-received by market players.

In terms of market activity, volume was thin as investors remained on the sidelines amidst the Omicron surge. Average Daily Turnover declined by 49.1% to US\$118.6 million. For foreign activity, foreigners were net sellers, registering an outflow of US\$56 million. January was a quiet month with foreign participation dipping to 35% from 45% in December 2021.

In terms of individual stock performance, the PSEi names were split almost equally with 15 gainers and 14 losers. The main advancers were: AP (+18.86%), JGS (+17.92%) and AEV (+15.70%). Meanwhile, the top laggards include: RRHI (-13.76%), ACEN (-13.27%) and SECB (-9.92%).

Fund Performance. The Fund registered a gain of 3.43% in January, outperforming its benchmark by 7bps.

Fund Strategy. We remain strategic long-term buyers of Philippine equities on the back of economic recovery, favoring quality names and position on cyclicals. We will continue to be nimble and take advantage of tactical opportunities.
