**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Equity Price Risk:** The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

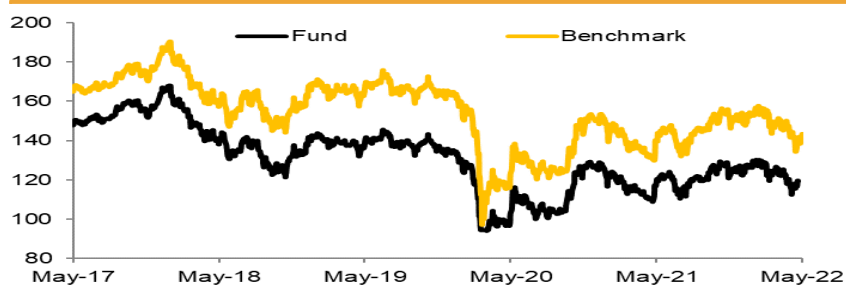

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange Index (PSEi) managed to eke out gains for the eventful month of May. While the market continued to move in line with external events, politics was in the spotlight in the domestic space as the National Elections took place last May 9. Ferdinand Marcos Jr. emerged victorious as the President-elect after garnering majority of the votes. Alongside him is his running mate and daughter of the outgoing President, Sara Duterte, who won the Vice Presidency. Market sentiment was dampened still largely due to global economic concerns, local inflationary worries, and liquidity events (i.e MONDE's float number increase, CNVRG secondary share placement and MSCI rebalancing). However, the market rebounded following the appointments of key economic cabinet members and the release of better-than-expected 1Q 2022 GDP results. The PSEi rose by 0.65% to close at 6,774.68.

We saw significant level of activity during the month of May with Average Daily Turnover registering at US\$187 million or 90.8% higher than in April. Meanwhile, foreigners continued to be net sellers with a Net Foreign Outflow of US\$350 million in May, stretching the Year-to-date figure to US\$569 million.

In terms of individual stock performances, top contributors for the month include: MONDE (+14.02%), MBT (+7.63%) and GLO (+6.96%) while the laggards were SECB (-10.39%), AGI (-9.48%) and EMP (-8.41%).

**Fund Performance.** The Fund registered a gain of 0.92% in May, outperforming its benchmark by 27 bps. Meanwhile, the YTD performance of the Fund reported a loss of 3.79%, outperforming its benchmark by 110 bps.

**Fund Strategy.** To stay defensive following an impending higher inflation print, higher yields and accelerated global tightening. Take profit on names that have priced-in the recovery story. Continue to be nimble and ready for any tactical opportunities.
