## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index returned 1.29% in December as the local yield curve bull flattened, dropping 18 basis points (bps) on average. Average daily trading volume for the month amounted to PHP15.48 billion significantly lower than November's PHP29.54 billion with trades mostly seen on the long end of the curve.

The Bureau of the Treasury (BTr) held only one FXTN auction in December. The 10-year FXTN 10-71, was fully awarded at an average yield of 6.224%. Meanwhile, the scheduled 15-year FXTN issuance was cancelled. Towards the end of the month, the BTr released the auction schedule for the first quarter of 2024, with weekly Treasury Bill auctions and monthly FXTN issuances (3-, 5-, 7- and 10-year tenors) and an additional 20-year issuance in February with an offer size of PHP30 billion each.

In the local space, November headline inflation fell sharply to 4.1% year-on-year from 4.9% last month. The slowdown in inflation was driven by all major subsectors with food inflation decelerating to 5.7% year-on-year from the previous 7% and transport cost contracting by 0.8% year-on-year due to lower global oil prices. The BSP retained its key policy rate at 6.5% during its last monetary board meeting for the year. Despite the inflation figure trending lower, BSP Governor Eli Remolona noted that risks to the inflation outlook remain tilted to the upside.

**Fund Performance.** The Fund returned 1.47% for the month, above the benchmark by 18 basis points.

**Fund Strategy.** The fund will maintain its higher duration versus benchmark in the likelihood of yields declining in the medium term on expected monetary policy pivot from global central banks in 2H2024. Nonetheless, we are cognizant of uncertainties coming from lingering upside risks to inflation as well as geopolitical tensions. While volatility may linger, aggressive central bank action has presented bond fund investors with the opportunity to capture higher returns over the medium to long term.
