OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.59% in March as the benchmark government yield curve flattened with the short-end of the curve rising and the long-end falling. Average daily trading volume rose to PHP14.83 billion from February's PHP11.91 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) recently decreased each auction's offer size to PHP25 billion for the five FXTN issuances in March. The 6-year FXTN 7-67, 10-year FXTN 10-69, 13-year FXTN 25-7, 20-year FXTN 20-25, and 7-year FXTN 7-68 were all fully awarded at average yields of 6.172%, 6.378%, 6.167%, 6.631%, and 6.162%, respectively. Towards the end of the month, the BTr released the April auction schedule with four Treasury Bill auctions and four FXTN issuances (3-, 9-, 13-, and 7-year tenors) each with an offer size of PHP25 billion.

In the local space, February inflation printed lower than market expectations at 8.6% year-on-year. The decline in the February figure can be attributed to slower transport costs and flat utility inflation. Despite easing headline inflation, food inflation accelerated further as supply-side constraints continue. Consequently, the Bangko Sentral ng Pilipinas (BSP) hiked its policy rate by 25 basis points to 6.25% during the March Monetary Board meeting, reiterating its commitment to fighting elevated inflation. Furthermore, the central bank trimmed its 2023 inflation forecast to 6.0% from 6.1%.

Fund Performance. The Fund returned 0.27% for the month, behind the benchmark by 32 basis points.

Fund Strategy. The fund targets to gradually increase duration as interest rates are seen to peak in the near term. Performance is subject to the government's success in containing inflation and keeping local bonds' spreads attractive over benchmark US securities. While volatility may linger, aggressive central bank action has presented bond fund investors opportunity to capture higher returns over the medium to long term.
