OUTLOOK AND STRATEGY

Market Review.

The BPI Government Bond Index returned -1.33% in October as the local yield curve bear steepened, rising 45 basis points (bps) on average. Average daily trading volume for the month amounted to PHP10.15 billion lower than September's PHP18.22 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held only three FXTN auctions in October. The 5-year FXTN 10-64, 7-year FXTN 7-70, and 10-year FXTN 10-71 re-issuances were fully awarded at average yields of 6.512%, 6.675%, and 6.954%, respectively. Towards the end of the month, the BTr released the November auction schedule with five Treasury Bill auctions and five FXTN issuances (5-, 7-, 10-, 15-, and 6-year tenors) with an offer size of PHP30 billion each.

In the local space, September headline inflation rose by 6.1% year-on-year, exceeding market expectations of 5.7%. Coming from last month's 5.3%, inflation continued to accelerate as food and energy prices jumped with rice prices surging 17.9% year-on-year. Consequently, the Bangko Sentral ng Pilipinas (BSP) delivered an off-cycle rate hike, raising its key policy rate by 25 basis points in an effort to subdue the persistent price pressures. The BSP's FY2024 inflation forecast was raised to 4.7% from the previous 4.3%. With regard to the upcoming November Monetary Board meeting, the central bank noted that it would remain data dependent in considering the future path of policy rates.

The Philippine Stock Exchange Index (PSEi) sank below the 6,000 mark as a slew of unfavourable macro-economic developments kept investors on the edge. On the global front, weakness in US indices and global equities was evident as an effect of rising yields where 10-year US Treasury yields climbed over 5% for the first time since 2007. Moreover, the US Federal Reserve (Fed) maintained their hawkish stance as they opted to keep interest rates elevated to fight sticky inflation. The on-going geopolitical tensions between Israel and Hamas added to concerns with its potential escalation to other nations in the Middle East. This pose further risk to global oil prices. On the local economic front, the Bangko Sentral ng Pilipinas (BSP) decided to hike its policy rate by 25 basis points to 6.5% in an off-cycle meeting to counter supply-side pressures in CPI inflation. The PSEi dipped 5.5% month-on-month in October to close at 5,973.78.

Trading activity in October subsided after strong activity seen in index-rebalancing events in September. Average daily turnover registered at US\$81 million or 37.8% lower month-on-month. Meanwhile, foreigners continued to be net sellers with US\$171 million worth of outflows.

In terms of stock performance, the top three gainers for the month included: ACEN (+7.94%), TEL (+2.89%) and EMI (+0.24%). Meanwhile, the bottom three performers were: SCC (-16.91%), AGI (-13.96%) and CNVRG (-12.81%).

Fund Performance. The fund returned -2.67% in September, outperforming the benchmark by 30 basis points. Year-to-date, the Fund registered a loss of 2.61%, above the benchmark by 41 bps

Fund Strategy. The Fund will remain defensive amidst the volatility in the stock market. Elevated interest rates, sticky global inflation and strong US dollar to continue to dampen demand for risk assets. The fund will be nimble and take advantage of market swings to rebalance in favor of high-quality names.

For the fixed income portion of the fund, the Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- (a) Shares of Stock of selected corporations which are already listed or being offered publicly and soon to be listed in major capital markets.
- (b) Primarily medium term tradable fixed-income instruments issued or guaranteed by the Philippine government or the BSP; tradable fixed-income instruments issued by financial institutions or private corporations; exchange-listed securities; marketable instruments that are traded in an organized exchange; loans traded in an organized market; and, such other tradable investment outlets/ categories as the BSP may allow.
- (c) Primarily medium term tradable fixed-income securities issued, underwritten, or otherwise dealt by BPI and/or any of its subsidiaries, affiliates, their successors-in-interest or assignees, their directors, officers, stockholders, and related interest, and any of their trust and fund managed accounts, under such terms and conditions as the Trustee may deem to be in the best interest of the Fund.
- (d) Bank deposits and such other investments allowed under regulations issued by the BSP.
