OUTLOOK AND STRATEGY

Market Review.

The BPI Government Bond Index returned -1.35% in June as the local yield curve inverted, rising 39 basis points (bps) on average. Average daily trading volume fell significantly to PHP8.55 billion from May's PHP21.77 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in June. The 5-year FXTN 10-63, 15-year FXTN 20-22, 6-year FXTN 7-67, and 9-year FXTN 10-69 re-issuances were all fully awarded at average yields of 5.805%, 6.085%, 6.097%, and 6.243%, respectively. Towards the end of the month, the BTr released the July auction schedule with four Treasury Bill auctions and four FXTN issuances (9-, 15-, 6-, and 7-year tenors) while increasing the offer size to PHP30 billion each.

In the local space, May headline inflation slowed down further to 6.1% year-on-year, from last month's 6.6% year-on-year. The dwindling inflation figure was primarily driven by a decrease in transport prices and slower food inflation. During its scheduled policy meeting, the Bangko Sentral ng Pilipinas (BSP) paused its tightening cycle and kept its policy rate unchanged at 6.25% as headline inflation continued in a downward trend. Moreover, the central bank adjusted its inflation forecast lower for 2023 to 5.4% but higher for 2024 to 2.9%.

The Philippine Stock Exchange Index (PSEi) finished below the 6,500 level again on muted volumes as worries over the elevated interest rate environment persisted. The US Federal Reserve (The Fed) kept benchmark rates steady in the latest FOMC meeting but still gave a hawkish stance by hinting of potentially two more rate hikes this year. Meanwhile on the local front, the Bangko Sentral ng Pilipinas (BSP) also maintained interest rates with retiring BSP Governor Medalla stating that the central bank will only cut rates should inflation fall within the BSP target band of 2% to 4%. The PSEi dropped 0.14% to 6,468.17 in June.

We saw lackluster trading for the month of June with Average Daily Turnover only at Php4.27 billion or 15% lower month-on-month. Meanwhile, foreigners turned "Net Buyers" at US\$97 million, mostly flowing through banks, particularly BPI and BDO. However, foreign participation fell to 38% compared to 53% in the previous period.

As for individual stock performances, the top three index gainers for the month were: MPI (+9.66%), PLDT (+9.33%) and BPI (+8.85%). Meanwhile, the bottom three index performers included: WLCON (-14.96%), ACEN (-8.02%) and ALI (-7.60%).

Fund Performance. The fund returned -0.55% in June, underperforming the benchmark by 17 basis points. Year-to-date, it outperformed the benchmark by 69 basis points with a return of 1.22%.

Fund Strategy. The Fund will continue to be defensive as volatility keeps hampering investor sentiment. Elevated interest rates and sticky inflation coupled with slump in major economies are major risk factors. However, we will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.

For the fixed income portion of the fund, the Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
