INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a balanced UITF with 5% to 20% equities exposure that intends to achieve for its Participants long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine 1-3 Year Index and 10% PSEi net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 3.22% in November as the local yield curve bull steepened, dropping 69 basis points (bps) on average. Average daily trading volume for the month amounted to PHP29.54 billion significantly higher than October's PHP10.15 billion with trades mostly seen on the long end of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions in November. The first issuance, 5-year FXTN 10-64, was fully rejected by the BTr. Had the BTR fully awarded the paper, average yields would have risen to 7.196%. The 7-year FXTN 7-70 and 10-year FXTN 10-71 re-issuances were fully awarded at average yields of 6.807% and 6.781%, respectively. The last two issuances of the month, 15-year FXTN 20-23 and 6-year FXTN 7-68, had decreased offer sizes of PHP20 billion each and were fully awarded at average yields of 6.593% and 6.099%, respectively. Towards the end of the month, the BTr released the December auction schedule with two Treasury Bill auctions and two FXTN issuances (10- and 15-year tenors) with an offer size of PHP20 billion each.

In the local space, October headline inflation dropped to 4.9% year-on-year from the 6.1% print in September. The slowdown in inflation was mainly driven by lower food inflation with rice prices decreasing following peak harvest season and import arrivals. The third quarter GDP print came out at 5.9% year-on-year, exceeding market expectations of 4.7%. Coming from a contraction in the previous quarter, the economy rebounded given the 6.7% rise in government spending. Consequently, the Bangko Sentral ng Pilipinas (BSP) held its key policy rate at 6.5% during its November Monetary board meeting after delivering an off-cycle rate hike in the previous month. The central bank perceives the current policy settings to be appropriate until inflation move towards the target range. The BSP lowered its forecast for FY 2024 inflation to 4.4% from the previous 4.4% and 2025 to 3.4% from 3.5%. The central bank noted that growth outlook remains intact, and they remain ready to tighten further if needed.

The local equities market recovered anew in November after a weak October showing where the index fell below the 6,000-mark. The rally emanated from growing expectations that interest rates may have already peaked following a seemingly improved economic environment. Reports on higher-than-expected 3rd quarter GDP at 5.9%, cooling inflation from both local and the US, Philippine peso strength and central banks' (US Fed and BSP) decision to hold key policy rates propelled sentiment. Moreover, investors digested reports on 3rd quarter earnings results from Philippine companies which showed positive results, albeit at a slower pace which reflects the impact of higher inflation. The Philippine Stock Exchange Index (PSEi) rose 4.18% to 6,223.73 in November.

Trading activity continued to be uninspiring with the average daily turnover slowing down further by -12.3% to US\$71 million for the month. In terms of foreign flows, foreigners finally turned "net buyers", after consecutive months of selling, and were also 53% of active participants. Net foreign inflow was recorded at US\$18 million for November.

In terms of stock performance, the top three gainers for the month include: ALI (+12.03%), JFC (+10.54%) and AC (+9.66%). Meanwhile, the bottom three performers were: ACEN (-9.43%), AGI (-7.55%) and NIKL (-7.34%).

Fund Performance. The fund returned 1.40% in November, underperforming its benchmark by 25 bps. Year-to-date, the Fund registered a gain of 3.38%, ahead with the benchmark by 16 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will remain defensive amidst the volatility and thin liquidity in the stock market. Elevated interest rates, sticky global inflation, and resilient US dollar will likely continue capping risk assets. The fund will be nimble in maximizing market swings to rebalance in favor of high-quality names.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- (a) Shares of Stock of selected corporations which are already listed or being offered publicly and soon to be listed in major capital markets.
- (b) Primarily medium term tradable fixed-income instruments issued or guaranteed by the Philippine government or the BSP; tradable fixed-income instruments issued by financial institutions or private corporations; exchange-listed securities; marketable instruments that are traded in an organized exchange; loans traded in an organized market; and, such other tradable investment outlets/ categories as the BSP may allow.
- (c) Primarily medium term tradable fixed-income securities issued, underwritten, or otherwise dealt by BPI and/or any of its subsidiaries, affiliates, their successors-in-interest or assignees, their directors, officers, stockholders, and related interest, and any of their trust and fund managed accounts, under such terms and conditions as the Trustee may deem to be in the best interest of the Fund.
- (d) Bank deposits and such other investments allowed under regulations issued by the BSP.
