*Billings received for August 2023 divided by the average daily NAV for the month valued at Php 139.93 mn
 *Billings received for July 2023 divided by the average daily NAV for the month valued at Php 139.76 mn
 *Billings for 2018 divided by average daily NAV

INVESTMENT OBJECTIVE AND STRATEGY

The Fund is a balanced UITF with 5% to 20% equities exposure that intends to achieve for its Participants long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine 1-3 Year Index and 10% PSEi net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Invest Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

Investments in the said outlets were approved by the BPI Wealth's Board of Directors. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

* Related party in accordance with BPI Wealth's internal policy.

OUTLOOK AND STRATEGY

Market Review. The local equities market sharply declined given the combination of illiquid market condition and worrisome macroeconomics data on both local and global space which forced investors to err on the side of caution. According to the minutes of the latest FOMC meeting of US Federal Reserve's (The Fed), officials spoke with a hawkish tone – expressing concerns on inflation pace which might lead to more rate hikes. Moreover, selling pressure intensified following the release of the 2nd quarter Philippines GDP which came out a shocker. The local economy grew at 4.3% which was way below consensus estimates of 6.0% - mostly due to the steep decline in government expenditures (-7.0% YoY). The PSEi dropped by 6.3% to close at 6,175.25 in August.

Activity in August improved as Average Daily Turnover came in at Php5.21 billion from Php3.46 billion in the prior month. Foreigners remained net sellers at US\$131 million with large flows coming out of index heavyweights SM and SMPH. Moreover, the MSCI quarterly rebalancing which indicated a reduction in the country's weighting further added to the sell-off.

For stock performances, the top three gainers for the month were as follows: SCC (+10.92%), GTCAP (+5.05%) and MPI (+3.70%). Meanwhile, the bottom three index performers included: CNVRG (-23.07%), JGS (-15.10%) and AEV (-12.64%).

The BPI Government Bond Index returned 0.50% in August as the belly of the curve dropped while the short end of the curve went up. The average daily trading volume for the month amounted to PHP16.82 billion similar to July's PHP16.94 billion with trades mostly seen on the short end of the curve.

The Bureau of the Treasury (BTr) held five FXTN auctions in August. A new 10-year paper issuance, FXTN 10-71, was fully awarded at a coupon rate of 6.625%. The 5-year FXTN 10-63 and 6-year FXTN 7-68 re-issuances were partially awarded at average yields of 6.337% and 6.468% while the 5-year FXTN 10-64 re-issuance was fully awarded at an average yield of 6.220%. The 15-year FXTN 20-23 re-issuance was the first auction rejected for the year. Had the BTr fully awarded the paper, average yields would have risen to 6.927%. Towards the end of the month, the BTr released the September auction schedule with four Treasury Bill auctions and four PHP30 billion FXTN issuances (3-, 7-, 10-, and 3-year tenors).

In the local space, July headline inflation eased further to 4.7% year-on-year, from last month's 5.4%. The food, utilities, and transport prices drove the inflation lower marking six straight months of deceleration. The Philippine economy grew weaker than expected at 4.3% in the second quarter of the year, compared to the market expectation of 6%. Growth momentum was at its slowest pace since 2011 due to above-target inflation, elevated borrowing costs, and government underspending. The Bangko Sentral ng Pilipinas (BSP) kept its policy rate at 6.25% for the third time. BSP Governor Eli Remolona reiterated that they remain data-dependent but ready to hike policy rates if necessary. The BSP revised its inflation forecast upward, settling at 5.6% (from 5.4%) for 2023 and 3.3% (from 2.9%) for 2024 due to developments in global energy and food prices.

Fund Performance. The fund returned -0.03% in August, outperforming its benchmark by 18 bps. Year-to-date, it outperformed the benchmark by 10 basis points with a return of 2.04%.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will maintain its defensive stance given the heightened volatility from internal and external sources. The elevated interest rate environment, inflation and slow growth continue to drag sentiment. The fund will take advantage of market swings to rebalance in favor of high quality names.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- (a) Shares of Stock of selected corporations which are already listed or being offered publicly and soon to be listed in major capital markets.
- (b) Primarily medium term tradable fixed-income instruments issued or guaranteed by the Philippine government or the BSP; tradable fixed-income instruments issued by financial institutions or private corporations; exchange-listed securities; marketable instruments that are traded in an organized exchange; loans traded in an organized market; and, such other tradable investment outlets/ categories as the BSP may allow.
- (c) Primarily medium term tradable fixed-income securities issued, underwritten, or otherwise dealt by BPI and/or any of its subsidiaries, affiliates, their successors-in-interest or assignees, their directors, officers, stockholders, and related interest, and any of their trust and fund managed accounts, under such terms and conditions as the Trustee may deem to be in the best interest of the Fund.
- (d) Bank deposits and such other investments allowed under regulations issued by the BSP.
