OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) declined in February, reversing most gains in January. Risk-off sentiment prevailed after inflation from both US (+6.4%) and Philippines (+8.7%) came out higher-than-expected which may signal a prolonged high interest-rate environment. Meanwhile, liquidity events such as PSE and MSCI rebalancing took effect this month, increasing trading activity. The local bourse dropped 3.5% to close at 6,556.20.

In terms of trading activity, the PSE was more active in February with average daily value turnover at USD146.4 mil or 1% higher than USD114.9 million recorded in the prior month. Meanwhile, foreigners became "Net Sellers" for the month with US\$142 million exiting the country. Foreign participation came in at 48%.

For the individual stock performances, the top index gainers for the month included: SMC (+15.12%), MER (+13.26%) and BPI (+4.57%). Meanwhile, the bottom index performers were as follows: GLO (-12.13%), AC (-11.60%) and ACEN (-9.43%).

The BPI Government Bond Index returned -0.47% in February, with benchmark government yields rising 21 basis points (bps) on average. Average daily trading volume fell to PHP11.91 billion from January's PHP17.55 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) only held two FXTN auctions in February. The 13-year FXTN 25-7 and 10-year FXTN 10-69 were fully awarded at average yields of 6.197% and 6.258%, respectively. Two FXTN auctions were cancelled after the BTr announced its first Retail Treasury Bond (RTB) issuance for the year. The government priced the 5.5-year RTB (RTB5-17) at a coupon rate of 6.125% and raised Php283.71 billion from the sale. Towards the end of the month, the BTr released its March auction schedule with five Treasury Bill auctions and five FXTN issuances (6-, 10-, 13-, 20-, and 7-year tenors).

In the local space, January inflation exceeded expectations printing 8.7% year-on-year, the highest since November 2008. The inflation uptrend was mainly driven by housing, electricity, water, fuel, and food-related expenses. Consequently, the Bangko Sentral ng Pilipinas (BSP) hiked its policy rate by 50 basis points to 6.00% during the first Monetary Board meeting of the year, to curb demand and limit inflation. The central bank raised its 2023 inflation forecast to 6.1% but maintained its 2024 forecast at 3.1%.

Fund Performance. The fund returned -0.33% in February, outperforming its benchmark by 9 bps. Year-to-date, it underperformed the benchmark by 24 basis points with a return of 0.89%.

Fund Strategy. The Fund looks to maintain its underweight duration position given expectations of rising interest rates moving forward. It will likewise continue to hold high quality corporate bonds for yield enhancement. Though inflation has exceeded the government's target range, the BSP remains vigilant in monitoring supply side pressures and potential second-round effects. Volatility will persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
