## OUTLOOK AND STRATEGY

**Market Review.** Global equity markets rebounded in November. The US Federal Reserve kept rates steady for the second consecutive month, driving expectations that the central bank is nearing its peak level for this rate hiking cycle. November delivered mixed economic data for the US. The labor market remained resilient but showed signs of softening, with October unemployment rate rising from 3.8% to 3.9% and nonfarm payrolls posting below expectations at 150,000 jobs added versus the expected 180,000. US inflation also continued its moderation with the October year-on-year CPI at 3.2%. Investor sentiment improved over the past month as yields moved lower driven by peak interest rate expectations amid the declining inflation trend and softening economic data. The shift in sentiment provided support to risk assets and drove global equity markets its highest return since mid-2022. MSCI All Country World returned 9.28% for the month, with developed markets outperforming emerging markets.

**Fund Performance.** The fund returned 5.49% in November, below the benchmark by 118 basis points. On a year-to-date basis, the fund gained 13.43%, underperforming the benchmark by 34 basis points.

**Fund Strategy.** The fund manager will continue to invest in equities of medium to large capitalization companies while integrating Catholic social teachings into the investment process.
